Knight Oil Tools International's Colombia Operations Pick Up Steam

Knight Oil Tools International's Colombia office commenced operations in the capital city of Bogotá in September 2012. Since then, the operation has grown into three facilities. The main office is located in Bogotá and the company maintains a fishing services and drilling jar facility in nearby Mosquera and a rental drill pipe yard in Neiva. The Colombia operations offer fishing and thru-tubing services, whipstocks, and drilling jar and drill pipe rental services to customers in the dynamic Colombian oil and gas industry.

The Bogotá office is staffed by the Country Manager, Business Manager, Human Resources Manager, QHSE Manager, Sales Representatives and Fishing Services and Thru-Tubing Supervisors. *The staff is shown in the photo on the right taken recently in the Mosquera fishing tool and drilling jar facility.*

Since its inception, the Colombia operations have been focused on employee safety and their record proves it. There have been no accidents or injuries recorded since operations began in 2012. *Employees learned proper safety procedures and first aid through "hands-on" training and instruction conducted recently by members of the Bogotá Fire Department.*

This year, the Colombia facility has begun fulfilling ISO Certification requirements for quality operating procedures and systems. The ISO Certification process should be completed by year-end.

Colombia was the first international venture for Knight Oil Tools and its business has been steadily improving along with the strength and growth of the country's oil and gas activity.

For more than 40 years, Knight Oil Tools has been providing "zero-failure" equipment and services to the oil and gas industry. With more than 50 locations worldwide, Knight Oil Tools has grown to include Rental Tool Services, Fishing Services, Manufacturing, Inspection and Hardbanding, and QHSE Training and Consulting – making it the largest privately held rental and fishing tools company in the world.
