Knight Oil Tools Introduces a Better Way to Handle Pipe

For years, the way pipe is stacked, transferred and transported hasn't changed much—until now. Knight Oil Tools is changing the way pipe is handled with the patented Pipe Safety Basket (PSB). The PSB, available for rental from Knight Oil Tools Rental Tool Services, is a protective enclosure that changes the way pipe is handled for the better. Pipe Safety Baskets reduce shipping damage and dockside/location handling expenses.

The modular basket includes a self-aligning, interlocking design with folding support stanchions, allowing for up to four empty Pipe Safety Baskets to be stacked for easy transport back to the pipe yard. Five integral retractable ratchet straps and Rumber® pipe stripping material hold the pipe securely in place within the PSB.

Dimensions and maximum weight limits allow for transportation of two loaded baskets on a standard 18-wheeler float. Pipe Safety Baskets have a maximum capacity of 19,037 lbs and the open-ended bay can accommodate Range 2 and Range 3 tubulars. Knight Oil Tools' Pipe Safety Baskets provide crane or fork lift accessibility for loading and unloading, are designed for single-line lift and are compatible with NOV Pipe Deck Machines on offshore locations.

For more than 40 years, Knight Oil Tools has been providing “zero-failure” equipment and services to the oil and gas industry. With more than 50 locations worldwide, Knight Oil Tools has grown to include Rental Tool Services, Fishing Services, Manufacturing, Inspection and Hardbanding, and QHSE Training and Consulting – making it the largest privately held rental and fishing tools company in the world.
