Knight Oil Tools to Exhibit at DUG Conferences

Knight Oil Tools is a Bronze Sponsor of Hart Energy’s Drilling Unconventionals (DUG) Conference to be held May 20-22, 2014, in Fort Worth, Texas. More than 2,400 oil and gas industry professionals are expected to attend the three-day conference. Conference attendees will take part in educational and networking opportunities and will be able to access new products and services that are driving renewal in the Permian Basin, one of the premier oil basins in the United States. Daily production from the Permian Basin already exceeds volumes from the Bakken and Eagle Ford plays.

In September, Knight Oil Tools will be a Bronze Sponsor of Hart Energy’s DUG Eagle Ford Conference which will be held September 15-17, 2014, at the Henry B. Gonzalez Convention Center in San Antonio, Texas. The Eagle Ford shale play is a vast, complex, prolific and economically viable basin where location and operating practices are extremely important. The DUG Eagle Ford Conference gives producing companies from around the world and local firms the opportunity to gain the operating expertise to succeed in the Eagle Ford play.

At the conferences, Knight Oil Tools will be promoting Megaton™ drilling jars, whipstocks, stabilizers and reamers, as well as its Rental Tool Services, Fishing Services, Manufacturing, Inspection and Hardbanding, and QHSE Training and Consulting service lines.

Knight Oil Tools recently exhibited at the 2014 Offshore Technology Conference (OTC) held May 5-8 at the Reliant Center in Houston, Texas. This year, attendance at OTC reached a 46-year high of 108,300 – the largest recorded attendance in the history of the conference. Manufacturers and vendors from 2,568 companies representing 43 countries exhibited at this year’s event.

For more than 40 years, Knight Oil Tools has been providing “zero-failure” equipment and services to the oil and gas industry. With more than 50 locations worldwide, Knight Oil Tools has grown to include Rental Tool Services, Fishing Services, Manufacturing, Inspection and Hardbanding, and QHSE Training and Consulting – making it the largest privately held rental and fishing tools company in the world.
